Independent Auditors' Report

The Board of Trustees
Spelman College:

We have audited the accompanying financial statements of Spelman College, which comprise the statements of financial position as of June 30, 2014 and 2013, and the related statements of activities and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Spelman College as of June 30, 2014 and 2013, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

(1) Summary of Significant Accounting Policies

(a) General

Spelman College (the College) is a private, nonprofit institution of higher education located in Atlanta, Georgia. The College provides education and training services for students at the undergraduate level and performs research, training, and other services under grants, contracts, and similar agreements with sponsoring organizations and governmental agencies.

(b) Basis of Presentation

The financial statements of the College have been prepared on the accrual basis in conformity with U.S. generally accepted accounting principles.

The College’s net assets and revenue, expenses, and gains are classified based on the existence or absence of donor-imposed restrictions.

Accordingly, the net assets of the College and changes therein are classified and reported as follows:

Unrestricted – Net assets that are not subject to donor-imposed stipulations.

Temporarily restricted – Net assets subject to donor-imposed stipulations that may or will be met either by actions of the College and/or the passage of time.

Permanently restricted – Net assets subject to donor-imposed stipulations that these be maintained permanently by the College. Generally, the donors of these assets permit the College to use all or part of the income and gains earned on the related investments for general or specific purposes.

Revenue from sources other than contributions is reported as increases in unrestricted net assets. Contributions are reported as increases in the appropriate net asset category. Contributions of assets other than cash and cash equivalents are initially recorded at their estimated fair value at the date of the gift, as determined by independent appraisal or other valuation methods as deemed appropriate by management. Contributions to be received after one year are discounted at a rate commensurate with the risks involved. Amortization of the discount is recorded as additional contribution revenue and classified in accordance with donor-imposed restrictions, if any, on the contributions.

Expenses are reported as decreases in unrestricted net assets. Realized and unrealized gains on investments are reported as increases in unrestricted net assets, unless their use is restricted by explicit donor stipulations or by law. Expirations of temporary restrictions (i.e. the donor-stipulated purpose has been fulfilled and/or the stipulated time period has elapsed) are reported as reclassifications from temporarily restricted net assets to unrestricted net assets. Temporary restrictions on gifts to acquire long-lived assets are considered met in the period in which the assets are acquired and placed in service and are reported as reclassifications from temporarily restricted net assets to unrestricted net assets.

(c) Investments

Investments consist of marketable securities, privately held limited partnerships and real estate.

(Continued)

Marketable securities are stated at fair value based on quoted market prices. The net realized and unrealized gains on investments are reflected in the statements of activities. Realized and unrealized gains are allocated to net asset classes dependent upon donor specifications.

Investments in private limited partnership interests are valued using the most current information provided by the general partner. The change in net assets related to limited partnership interests is presented as realized and unrealized gains based upon the estimated fair value of each partnership as determined by the general partner. General partners typically value privately held companies at cost as adjusted based on recent arm's-length transactions. Real estate partnerships and funds are valued based on appraisals of properties held and conducted by third-party appraisers retained by the general partner or investment manager. General partners of funds invested in marketable securities provide values based on quoted market prices and exchange rates for publicly held securities and valuation estimates of derivative instruments. Investment managers are authorized to employ derivative instruments, including swaps, futures, forwards, and options. These derivatives are generally used for managing interest rate or foreign currency risk or to attain or hedge a specific financial market position. The College does not have direct investments in such instruments. Management reviews and evaluates valuation information provided by general partners and investment managers, and management believes such values are reasonable estimates of fair value.

The College's investments include various types of investment securities and investment vehicles. Investment securities are exposed to various risks, such as liquidity, interest rates, currency, market, and credit risks.

Liquidity risk represents the possibility that the College may be unable to rapidly adjust the size of its portfolio holdings in times of high volatility and financial stress at a reasonable price. If the College was compelled to dispose of a liquid investment at an inopportune time, it may be required to do so at a substantial discount to fair value.

The College invests in alternative investments, which can be highly illiquid. Under adverse market or economic conditions, the secondary market for certain of these alternative investments could contract. As a result, the College could find it more difficult to sell these securities or may only be able to sell the securities at prices lower than if such securities were more widely traded. The College's interests in alternative investments are generally reported at the net asset value (NAV) reported by the fund managers, which is used as a practical expedient to estimate the fair value of the College's interest therein, unless it is probable that all or a portion of the investment will be sold for an amount different from NAV. As of June 30, 2014, the College had no plans or intentions to sell investments at amounts different from NAV.

The College holds investments denominated in currencies other than the U.S. dollar. Thus, there is exposure to currency risk because the value of the investments denominated in other currencies may fluctuate due to changes in currency exchange rates and this can have an adverse effect on the reported value of assets and liabilities denominated in currencies other than the U.S. dollar.

The College's investment portfolio is subject to interest rate and credit risks for certain securities whose valuation would be impacted by changes in interest rates. The portfolio is also subject to the risk where the issuer of a security is not able to pay interest or repay principal when it is due.

The value of securities held by the College may decline in response to certain economic events, including those events impacting entities whose securities are owned and included in the investment portfolio. Those events impacting valuation may include (but may not be limited to) economic changes, market fluctuations, regulatory changes, global and political instability, and currency, interest rate, and commodity price fluctuations. The College attempts to manage these risks through diversification, ongoing due diligence of fund managers, and monitoring of economic conditions.

Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the College's financial statements.

(d) Property and Equipment

Property and equipment are stated at cost at date of acquisition or at estimated fair value at date of donation, less accumulated depreciation.

Depreciation of property and equipment is provided over the estimated useful lives of the respective assets on a straight-line basis. A summary of depreciable lives is as follows:

Land improvements	25 years
Buildings	50 years
Furniture and equipment	5 years
Investment in the Robert W. Woodruff library at the Atlanta University Center Consortium, Inc.	7 years

(e) Advances from Federal Government for Student Loans

The College owns a one-tenth interest in its Federal Perkins Loan fund used to advance loans to Spelman students. The remaining nine-tenths is distributable to the federal government upon liquidation of the federal loan program and is recorded as a liability in the accompanying statements of financial position.

(f) Income Tax Status

The College is recognized as an organization exempt from federal income tax under Section 501(a) of the Internal Revenue Code (the Code) as an organization described in Section 501(c)(3), whereby only unrelated business income, as defined by Section 512(a) of the Code, is subject to federal income tax. The College reviews its tax positions annually and has determined that there are no material uncertain tax positions that require recognition in the financial statements at June 30, 2014 and 2013.

(g) Atlanta University Center Consortium, Inc.

The College records as expense an allocated share of expenditures made through Atlanta University Center Consortium, Inc., an affiliated organization, for the benefit of the four affiliated institutions.

(Continued)

(h) Cash Equivalents

Cash equivalents consist primarily of money market accounts, commercial paper, and any other short-term investments with original maturities of three months or less. Cash and cash equivalents that are part of the pooled investments are shown within investments as these funds are generally not used for daily operating needs.

(i) Use of Estimates

Management of the College has made certain estimates and assumptions relating to the reporting of the allowance for uncollectible student receivables and contributions receivables, useful lives of property and equipment, investments without readily determinable fair values, and accrued expenses to prepare the financial statements in conformity with U.S. generally accepted accounting principles. Actual results could differ from those estimates.

(j) Bond Issuance Costs

Bond issuance costs related to the registration and issuance of bonds are carried at cost, less accumulated amortization, and are being amortized over the life of the related bonds.

(k) Conditional Asset Retirement Obligations

The College has identified asbestos and lead paint abatement as conditional asset retirement obligations (ARO). Asbestos and lead paint abatement cost were estimated using a per/square foot estimate. The College is required to recognize period-to-period changes in an ARO liability resulting from the passage of time (accretion expense) and revisions in cash flow estimates. During 2014, Management recorded a $329,703 adjustment to the estimated cash flows as a result of a change in the per/square foot estimate due to a recent building abatement. The College's asset retirement obligations are included in accounts payable and accrued expenses in the accompanying statements of financial position.

The following table presents the activity of the College's asset retirement obligations for the years ended June 30, 2014 and 2013:

		2014	2013
Balance at beginning of year	$	2,503,966	2,460,681

Retirements		(681,088)	—
Change in estimated cash flows		(329,703)	—

	$ 15,046,691	15,988,429

Contributions are discounted at rates ranging from 3.02% to 9.84% for the years ended June 30, 2014 and 2013, commensurate with the risks involved. Amortization of the discount is recorded as additional contribution revenue and classified in accordance with donor-imposed restrictions, if any. The College's allowance for uncollectible contributions is estimated by using past collection history as an indication of future collections. At June 30, 2014 and 2013, the College's two largest outstanding donor pledge balances represented 55% and 72%, respectively, of the College's gross contributions receivable.

(3) Investments

The College has investments in certain partnerships, and is obligated under the related partnership agreements to invest additional capital amounts. The College estimates that the additional capital amounts will be paid over the next five years depending on timing of potential investment opportunities identified by investment fund managers.

The following is a summary of the liquidation terms of investments as of June 30, 2014 and 2013:

(a) This category includes assets that are cash or readily convertible to cash, such as money market funds.

(b) This category includes investments in funds that take long positions in publicly traded equity securities. Approximately 62% of these investments are in U.S. companies and 38% are in non-U.S. companies. A range of styles, market caps, and geographic focuses is included. The public nature of the securities makes this category very liquid.

(c) This category includes investments in hedge funds that take long and short positions largely in equity securities, credit securities and event driven situations. Managers vary in style, market cap focus, geographic focus, sectors of focus, and types of securities, with some having considerable flexibility in each of these areas. The funds also vary in net long/short positioning with most equity funds generally maintaining a low net and little or no leverage. Most credit funds generally maintain a moderate net long position and little or no leverage.

(d) This category includes investments in real estate equity funds and commodity funds that take ownership of properties ranging from office, retail, multi-family, land, hotel, and various other commodities. These are investments that cannot be redeemed since the investment is distributed as the underlying investments are liquidated, which generally takes 4-10 years. There are currently no plans to sell any of these investments prior to their liquidation so the assets are carried at NAV as estimated by the manager.

(e) This category includes investments in private equity funds that provide growth equity or take full ownership of the companies in which they invest. Private equity funds take significant ownership positions in start up or early stage companies largely in the technology or healthcare spaces. These are private investments that cannot be redeemed since the investment is distributed as the underlying investments are liquidated, which generally takes 4-8 years. There are currently no plans to sell any of these investments prior to their liquidation, so the assets are carried at NAV as estimated by the manager.

(f) This category includes investments in funds that take long positions in publicly traded fixed income securities. Derivatives may be used to replicate securities or change the positioning of the portfolio without the need to buy or sell securities. The public nature of the securities makes this category very liquid.

As of June 30, 2014 and 2013, the College has $315,300,673 and $275,526,055, respectively, of investments that are reported at estimated fair value based on NAV of the funds. Unless it is probable that all or a portion of the investment will be sold for an amount different from NAV, the College has applied a practical expedient and concluded that the NAV reported by the underlying fund approximates the fair value of these investments. Management estimates of fair value are based upon information provided by general partners and investment managers. At June 30, 2014 and 2013, the College did not have any investments with redemption lock up provisions.

The College's investment return for the years ended June 30, 2014 and 2013 is as follows:

	2014	2013
Operating realized and unrealized gains on investments	$ 2,419	3,147
Nonoperating realized and unrealized gains on investments	52,299,805	27,871,029

Nonoperating endowment spending	13,365	13,365
	17,868,095	17,891,481
Investment return in excess of amounts designated for current operations and endowment spending	$ 38,874,526	17,054,352

Investment management fees approximated $2,053,000 and $1,773,000 for the years ended June 30, 2014 and 2013, respectively.

(4) Endowment Net Assets

The College's endowment consists of 294 individual funds established for a variety of purposes including both donor-restricted endowment funds and funds designated by the Board of Trustees to function as endowments. Net assets associated with endowment funds, including funds designated by the Board of Trustees to function as endowments, are classified and reported based on the existence or absence of donor-imposed restrictions.

(a) Interpretation of Relevant Law

The Board of Trustees of the College has interpreted the Uniform Prudent Management of Institutional Funds Act (UPMIFA or the Act), as adopted in Georgia, as providing among other things, expanded spending flexibility by allowing, subject to a standard of prudence, the institution to spend from an endowment fund without regard to the book value of the corpus of the fund. This flexibility under UPMIFA allows an expenditure that lowers the value of the corpus of an endowment fund below its book value, which was previously not allowed. The College classifies as permanently restricted net assets (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulation to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulations is added to the fund.

The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure by the College in a manner consistent with the standard of prudence prescribed by the Act. In accordance with the Act, the College considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds:

1. The duration and preservation of the fund
2. The purposes of the College and the donor-restricted endowment fund
3. General economic conditions
4. The possible effect of inflation and deflation
5. The expected total return from income and the appreciation of investments
6. Other resources of the College
7. The investment policies of the College

Endowment net assets consisted of the following at June 30, 2014 and 2013:

	2014

(b) Funds with Deficiencies

From time to time, the fair value of assets associated with individual donor-restricted endowment funds may fall below the level that the donor or the Act requires the College to retain as a fund of perpetual duration. Deficiencies of this nature that are reported in unrestricted endowed net assets were $147,271 and $697,457 as of June 30, 2014 and 2013, respectively. These deficiencies resulted from unfavorable market fluctuations that occurred shortly after the investment of new permanently restricted contributions and continued appropriation for certain programs that was deemed prudent by the Board of Trustees. Subsequent gains that restore the fair value of the assets of the endowment fund to the required level will be classified as an increase in unrestricted endowed net assets.

(c) Return Objectives and Risk Parameters

The College has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of the endowment assets. Endowment assets include those assets of donor-restricted funds that the College must hold in perpetuity or for a donor-specified period as well as board-designated funds. Under this policy, as approved by the Board of Trustees, the endowment assets are invested in a manner that is intended to produce results that exceed the price and yield results of a benchmark composed of 60% of the Russell 3000, 10% of the European and Far East (MSCI) Index, and 30% of the Barclays Aggregate Bond Index while assuming a moderate level of investment risk. The College expects its endowment funds, over three to five years, to provide an average annual real rate of return of approximately 5%–6% annually. Actual returns in any given year may vary from this amount.

(d) Strategies Employed for Achieving Objectives

To satisfy its long-term rate-of-return objectives, the College relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends). The College targets a diversified asset allocation that places emphasis on investments in equities, fixed income, hedge funds, and alternative assets (distressed, real estate, venture capital, and private equities) to achieve its long-term objectives within prudent risk parameters.

(e) Spending Policy

The College utilizes the total return concept (income yield and appreciation) in the management of its endowment. The College has implemented a spending policy designed to stabilize annual spending levels and preserve the real value of the endowment over time. In accordance with the College's policy, a predetermined endowment spending rate, consistent with the College's total return objective, has been established. Should the actual return be insufficient to support this policy, the balance is provided from net accumulated appreciation. Should the return exceed the amounts withdrawn in accordance with the spending policy, the balance is reinvested in the endowment.

The College has a policy of appropriating for distribution each year 5.25% of a weighted average of its endowment funds values as of September 30 for each of the four fiscal years preceding the fiscal year in which the distribution is planned. In establishing these policies, the College considered the expected return on its endowment. Accordingly, the College expects the current spending policy to allow its endowment to maintain its purchasing power by growing at a rate at least equal to planned payouts. Additional real growth will be provided through new gifts and any excess investment return. The College withdrew an additional 0.50% of the fair value of the endowment as of the beginning of the year for each of the years ended June 30, 2014 and 2013 in order to support its capital campaign. The actual spending rate used to support the College's operating budget for the years ended June 30, 2014 and 2013, calculated as a percentage of the fair value of the endowment as of the beginning of the year, was approximately 5.50% and 5.80%, respectively.

Under the terms of the agreements related thereto, the Revenue Bonds of 2003 (the 2003 bonds) are unsecured general obligations of the College. The proceeds of the 2003 bonds were for the purpose of financing or refinancing all or a portion of various projects and advance refunding of the 1994 bonds. In April 2012, $17,010,000 of the proceeds from the issuance of the Revenue Bonds of 2012 was held in escrow for advance refunding of a portion of the 2003 bonds.

Under the terms of the bond financing documents related thereto, the Revenue Bonds of 1996 and 1999 are general obligations of the College. The bonds were secured by irrevocable, direct pay letters of credit issued by a commercial bank from the date of the original issuance of the bonds until September 21, 2009. On that date, the bond financing documents were amended to include a tax-exempt bank qualified option. This allowed the bonds to be purchased by the bank, which previously issued the letter of credit. The interest rate on the bonds changed to 67.0% of the sum of LIBOR plus 2.5%. The College continues to pledge “Unrestricted College Revenue” as security for its repayment obligations under the bonds. The maturity dates of the bonds did not change.

Under the terms of the agreements related thereto, the Revenue Bonds of 2007 (2007 bonds) are unsecured general obligations of the College. The proceeds of the 2007 bonds were for the purpose of financing all or a portion of various projects, as well as refunding the 1994 bonds, and repayment in full of the 2004 note payable.

Under the terms of the agreements related thereto, the Revenue Bonds of 2012 (2012 bonds) are unsecured general obligations of the College. The proceeds of the 2012 bonds were for the purpose of advance refunding a portion of the 2003 bonds and refunding the outstanding principal balances of the 2005 and 2008 notes payable to a commercial bank. Approximately $18,559,000 of the proceeds from the issuance of the 2012 bonds was placed in escrow in order to refund $17,010,000 of the 2003 bonds on June 1, 2012.

On September 16, 2011, the College entered into a computer equipment financing agreement with a manufacturer in the amount of $1,281,659. The note requires annual payments of $213,610, is noninterest bearing, and is secured by equipment having a book value of $640,829 and $897,161 at June 30, 2014 and 2013, respectively. The note matures on September 16, 2016.

The maturity schedule for bonds and notes payable as of June 30, 2014 is as follows:

	Year ending June 30

The terms of the bonds and note provide for certain nonfinancial covenants. The College's management believes it is in compliance with these requirements at June 30, 2014.

(7) Interest Expense

Interest expense related to bonds and note payable and the obligation under capital lease approximated $3,623,000 and $3,751,000 for the years ended June 30, 2014 and 2013, respectively.

(8) Net Assets Released from Restrictions

Net assets were released from donor-imposed temporary restrictions by incurring expenses satisfying the restricted purposes or by occurrence of other events specified by donors for the years ended June 30, 2014 and 2013 as follows:

	2014	2013
Operating:		
Scholarships and fellowships	$ 12,912,023	12,596,669
Instruction	6,133,002	6,305,112

Expired annuities	—	71,776
	$ 29,907,858	29,283,190

(9) Net Assets

Temporarily restricted net assets as of June 30, 2014 and 2013 were available for the following purposes:

	2014	2013
Scholarships and fellowships	$ 95,286,045	78,716,679
Programs and other operating purposes	103,324,208	87,544,646
Purchase of property and equipment	16,839,405	14,519,073
	$ 215,449,658	180,780,398

Permanently restricted net assets totaling $120,786,634 and $118,775,976 as of June 30, 2014 and 2013, respectively, consist of endowment investments whose income and net realized and unrealized gains are available for the College's operations, scholarships, and various academic programs.

(10) Fair Value

The College's estimates of fair value for financial assets and liabilities are based on the framework established in Accounting Standards Codification (ASC) Topic 820, *Fair Value Measurement*. This guidance establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1 inputs – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 inputs – Quoted prices for instruments that are identical or similar in markets that are not active and model-derived valuations for which all significant inputs are observable, either directly or indirectly in active markets.
- Level 3 inputs – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

As of June 30, 2014 and 2013, the College has approximately $315,000,000 and $276,000,000, respectively, of investments classified as either Level 2 or Level 3. While the College's investment in these funds is classified as Level 2 or 3, the underlying investments of the fund may be classified as Level 1 within the fund itself. The categorization of an investment within the hierarchy is based upon the pricing transparency of the investment to the investor and does not necessarily correspond to the perceived risk of that investment. The hierarchy requires the use of observable market data when available. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. The funds and the College use inputs in applying various valuation techniques that consider assumptions, which market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, operating statistics, specific and broad credit data, liquidity statistics, recent transactions, earnings forecasts, future cash flows, market multiples, discount rates and other factors.

Underlying fund investments made directly by the College whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include actively traded common and preferred stock, U.S. government fixed income instruments, and non-U.S. government fixed income instruments. Level 1 investments may also include listed mutual funds, exchange traded funds (ETFs) and money market funds.

Investments that trade in markets that are considered to be active, but are based on dealer quotations or alternative pricing sources supported by observable inputs or investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. Alternative pricing sources include quotations from market participants and pricing models which are based on accepted industry modeling techniques. These investments include U.S. investment-grade and below investment-grade debt securities, international corporate bonds, mortgage-backed securities, asset-backed securities, senior loans and bank loans, most derivative contracts other than futures, and commingled fund investments that would otherwise be classified in Level 3 but for which the College had the ability to redeem at NAV on or within 90 days after June 30.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 investments include limited partnerships, private placement investments, and commingled fund investments. Inputs used may include the original transaction price, recent transactions in the same or a similar market, completed or pending third-party transactions in the underlying investment or comparable issuers, and subsequent rounds of financing. When observable prices are not available, these investments are valued using one or a combination of the valuation techniques described below:

- Market Approach: This approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- Income Approach: This approach determines a valuation by discounting future cash flows.
- Cost Approach: This approach is based on the principle of substitution and the concept that a market participant would not pay more than the amount that would currently be required to replace the asset.

Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported NAV.

The College's investments for which NAV is used as a practical expedient to estimate fair value are classified as either Level 2 or Level 3 in the fair value hierarchy, depending on the classifications of the underlying fund assets and the College's ability to redeem its interest in the fund, at or near the financial reporting date. If the underlying fund assets are available for redemption at NAV at or near the financial reporting date (generally within 90 days), then the College's interest in the fund may be classified as a Level 2 investment. The classification of assets and liabilities in the fair value hierarchy is not necessarily an indication of the risks or liquidity, but is based on the transparency of the valuation inputs.

The carrying amounts of cash and cash equivalents, student accounts receivable, and grants and other receivables approximate fair value because of the terms and relatively short maturity of these financial instruments. Split-interest obligation carrying amounts approximate fair value because these instruments are recorded at estimated net present value of future cash flows determined as of the date of the gift. Investments are reported at fair value as of the date of the financial statements.

Contributions receivable for current year gifts are initially measured at fair value in the year the receivable is recorded based on the present value of future cash flows discounted at a rate commensurate with risks involved, which is an application of the income approach. Current year gifts included in contributions receivable reflected at fair value at June 30, 2014 and 2013 were approximately $3,100,000 and $1,700,000, respectively.

A reasonable estimate of the fair value of advances from the federal government and student loans could not be made because the notes receivable are not salable and can only be assigned to the federal government or its designees. The carrying value of institutional student notes receivable approximates fair value.

The carrying amounts of accounts payable, accrued payroll and employee withholdings, and other related accruals approximate fair value because of the relatively short maturity of these financial instruments.

The carrying amount of bonds payable with variable interest rates approximates fair value because the variable rates reflect current market rates for bonds with similar maturities and credit quality. The fair value of bonds and note payable with fixed interest rates is based on rates assumed to be currently available for bond issues and notes with similar terms and average maturities.

The following tables present additional information about Level 3 assets measured at fair value. Both observable and unobservable inputs may be used to determine the fair value of positions that were classified within the Level 3 category. As a result, the unrealized gains and losses for assets within the Level 3 category in the table below may include changes in fair value that were attributable to both observable and unobservable inputs.

The College’s accounting policy is to recognize transfers between levels of the fair value hierarchy on the date of the event or change in circumstances that caused the transfer. During 2014 and 2013, two funds and one fund, respectively, modified its strategy to no longer hold investments with unobservable inputs and was transferred from Level 3 to Level 2. During 2014 and 2013, there were no transfers into or out of Level 1.

(11) Operating Expenses

Expenses are reported in the accompanying statements of activities in categories recommended by the National Association of College and University Business Officers. The College’s primary program service is instruction. Expenses reported as academic support, student services, institutional support, and auxiliary enterprises are incurred in support of this primary program service. Institutional support includes fund-raising expenses approximating $3,950,000 and $3,430,000 for the years ended June 30, 2014 and 2013, respectively.

Operating expenses classified by natural type for the years ended June 30, 2014 and 2013 were as follows:

		2014	2013
Salaries and wages	$	35,744,487	36,129,903
Fringe benefits		9,439,570	9,149,533
Depreciation		5,213,946	5,442,177
Interest on indebtedness		3,622,756	3,750,902
Other expenses		30,530,939	30,935,300
Total operating expenses	$	84,551,698	85,407,815

The College allocates operation and maintenance of plant, interest and depreciation to the program and support expenses reported in the accompanying statements of activities based upon various methods. The following table reports the amount of these expenses included in the accompanying statements of activities for the years ended June 30, 2014 and 2013:

	2014

	$ 70,476,341	5,738,395	3,750,902	5,442,177	85,407,815

(12) Pension Plan

The College has a defined contribution retirement plan with Teacher's Insurance and Annuity Association and College Retirement Equities Fund, which covers substantially all full-time employees at time of employment. Employees are fully vested in the College's contributions after completing three full years of service.

Total pension expense under this plan approximated $1,658,000 and $1,568,000 for the years ended June 30, 2014 and 2013, respectively.

(13) Commitments and Contingencies

(a) Federal Compliance Audits

Certain federally funded financial aid programs are routinely subject to compliance audit. The reports on the examinations, which are conducted pursuant to specific regulatory requirements by the independent auditors for the College, are required to be submitted to both the College and the U.S. Department of Education. Such agency has the authority to determine liabilities, as well as to limit, suspend, or terminate federal student aid programs.

These audits could result in claims against the resources of the College. No provision has been recorded for any liabilities which may arise from such audits, since the amounts, if any, cannot be determined at this date. Management believes that any such amounts would not have a material adverse effect on its financial position at June 30, 2014.

(b) Litigation

The College is a defendant in various litigation considered to be in the normal course of business. Although the final results of any litigation cannot be predicted with certainty, the College believes the outcome of pending litigation will not have a material adverse effect on its financial position, changes in net assets, or cash flows.

(c) Operating Leases

The College has several noncancelable operating leases for equipment with expiration dates through 2019.

Future minimum lease payments for years ending June 30 are as follows:

2015	$	481,000
2016		390,000
2017		388,000
2018		383,000
2019		163,000
	$	1,805,000

Rent expense related to noncancelable operating leases with terms in excess of one year approximated $505,000 and $468,000 for the years ended June 30, 2014 and 2013, respectively.

(d) Capital Leases

Assets leased by the College under capital leases at June 30, 2014 and 2013 consist of the following:

		2014	2013
Telephone equipment	$	350,684	932,764
Less accumulated amortization		(315,616)	(826,560)
	$	35,068	106,204

The following is a schedule by year of future minimum lease payments under these capital leases, together with the present value of the minimum lease payments as of June 30, 2014:

Year ending June 30:		
2015	$	51,654
Less amounts representing interest		(764)
Present value of minimum lease payments	$	50,890

(14) Subsequent Events

The College evaluated subsequent events from the financial reporting date of June 30, 2014 through October 20, 2014, which is the date the College's financial statements were available to be issued and determined that there were no significant subsequent events requiring disclosure.
