Call for Teaching Demo Presentations

This daylong event is designed to celebrate innovative and engaging teaching at the AUC. The bulk of the program, then, is dedicated to interactive teaching demos by AUC faculty. When submitting your presentation, please keep in mind:

- Demos should be brief, lasting 10-12 minutes including a brief introduction with context and purpose, the demonstration itself, and an informal summary indicating student responses and outcomes.
- Demos should have an interactive component, for example asking audience members to engage in learning activities, provide responses to questions, or otherwise engage with the demonstration.
- We particularly encourage demonstrations that involve either active learning (i.e. not lecture) or authentic assessment (i.e. not exams, quizzes, or traditional term papers).
- If technology is required for the demonstration, presenters should send all files, links, etc. to TRRC@spelman.edu by 5 PM on May 30, 2023.
- Each presenter will receive a stipend/honorarium of \$200 from Spelman College after the event concludes. Participants must agree to provide any necessary paperwork or other information in order to receive the stipend.

To submit a presentation, complete the [registration form](#) by Friday, April 14, 2023. Register as a presenter and have the following information ready:

- *Your name, institution, department/program, institutional ID number*
- *Title of demonstration*
- *Course number and title in which demonstration is use*
- *Abstract between 150-250 words (including aim/purpose, summary of activity, student responses or outcomes)*

You will be notified with a decision about your submission by May 1, 2023.

Questions? Email TRRC@spelman.edu or contact your institutional teaching center representative.
