**Start Date:** Monday, June 03, 2019  
**End Date:** Friday, July 05, 2019

**Description:** The *online summer* intermediate language program entitled Spanish 201-202, is a two course *sequence*, which fulfills the foreign language requirement of the college core curriculum. Students who enroll in Spanish 201 must have passed Beginning Spanish 102 or have placed into the course through a departmentally administered Placement Exam. This course sequence provides the student with practice in the fundamental skills of listening, speaking, reading, and writing, with emphasis on oral proficiency. Upon successful completion of this course, the student will be able to apply a variety of communicative tasks in social situations. Communication in the target language uses predictable and familiar exchanges necessary for survival in the target culture. These include personal information related to self, family, home, daily activities, interests and personal preferences, as well as physical and social needs, such as food, shopping, travel, and lodging. Students will use the language in each session with a focus on one or more grammar topics and vocabulary necessary to communicate in specific situations. Students will memorize the vocabulary and practice the grammar for every course. In order to assure maximum exposure to Spanish, and efficiently develop students' skills in the language, this course will be almost exclusively in Spanish. The use of the English language will be for clarification, but will lessen, over the course of the semester, as students develop their skills.

**Instructor:** Ms. Kiandra Johnson

**Instructor E-mail:** [kjohn114@spelman.edu](mailto:kjohn114@spelman.edu)

**Start Date:** Monday, June 03, 2019

**End Date:** Friday, July 26, 2019

**Description:** This course covers the real number system, complex numbers, linear and quadratic equations, functions and graphs, polynomial and rational functions, and exponential and logarithmic functions. This course will improve the ability of the students to recognize and graph these special kinds of functions and to interpret information from their graphs. Emphasis will be placed on modeling and solving real-world problems using these functions. Certain topics in algebra and trigonometry are essential for calculus. To be successful in the study of calculus, a student must first have mastered these topics beyond the level generally attained in high school courses. This course provides instruction in the algebra and precalculus topics needed to prepare students for courses in differential and integral calculus and other higher-level mathematics courses.
